– Instructions –

Drafting the List of Selected Key Publications

Please adhere to the following instructions. You may refer to our FAQs for further information. Failure to comply with these requirements may result in delays in processing your application.

- Please draw up a list of selected key publications using the following template. We cannot accept lists that are structured differently.

- Please list between **one and three** key publications.
  Experienced researchers applying for a stay in Germany may only select papers on which they acted as thematic lead.

  Please note that any surplus key publications will be removed from the list without notification.

- The list of publications submitted to the Humboldt Foundation **may not** be amended with additional publications during the selection procedure.

- **Before uploading, please verify the accuracy of the information provided in your publication lists** (complete list, list of key publications). Please ensure that you:
  - List all names in the correct order,
  - Indicate all individuals with whom you share lead authorship or corresponding authorship,
  - List the title of the paper exactly as published,
  - Provide the correct name of the publication medium.

  Information that does not match the actual publication can lead to rejection of your application on formal grounds and may furthermore constitute a violation of the Rules of Good Scientific Practice, e.g. the requirement to be truthful regarding the contributions of partners, resulting in sanctions.

- Please only cite works that have been published, accepted or submitted for publication. Your (unpublished) dissertation or habilitation may be a possible exception.

- Please only provide title and authors for the submitted publications (see example 3).
