

Humboldt Life Network

Alexander von Humboldt
Stiftung/Foundation

Every year, the Alexander von Humboldt Foundation enables more than 2,000 researchers from all over the world to spend time researching in Germany. The Foundation maintains a network of well over 28,000 Humboldtians from all disciplines in more than 140 countries worldwide – including 55 Nobel Prize winners.

Humboldt Life

“Humboldt Life” is the Alexander von Humboldt Foundation’s online network. It has been tailored to the requirements of researchers and connects all the members of the Humboldt Family, thus creating a platform to promote professional and personal communication.

28 000 researchers of all disciplines worldwide
12 000 collaborative partners in Germany
1 001 new ideas
1 place to connect

Humboldt Life –
the Alexander von Humboldt Foundation’s
online network

Your profile on Humboldt Life

As a member of the Humboldt Family you will be given your own user profile where you can introduce yourself and present your research focus areas. Blogs, discussion groups, publication lists, member search, events, photo albums, surveys and much more are all designed to help you create your personal profile and facilitate communication with other members.

*This is what it looks like:

Martha Grey

I am a professor at the Institute for Cellular & Molecular Immunology, Göttingen, Germany.

My research focuses on Immunology, Virology and Human Medicine.

Fields of research

Immunology Virology Human Medicine

Academic title

Prof. Dr

Academic position

Associate Professor

Start of research stay as a Humboldtian

07-10-2013

Host institute

Institute for Cellular & Molecular Immunology, Göttingen, Germany

Relationship to Humboldt Foundation

- Fellow

Search for members

Are you looking for colleagues who are working on a certain subject or in a specific place? You can use the Humboldt Life member search function to find new collaborative partners in Germany and around the world – whether you are trying to trace colleagues you once worked together with or meet interesting new people.

Use the search engine to find other members.

Find out about network activities

All the interaction in the Humboldt Network, such as blogs, publications, comments, discussions, survey results, contact enquiries, bookmarks and photo albums, can be found on the Humboldt Life homepage. You will be

able to view the activities in the network and filter the relevant contents in order to identify the members and topics that are of interest to you. This will allow you to optimise your networking.

Every user profile is also equipped with its own network graph, visualising your networking connections and enabling you and those visiting your profile to gain a quick overview of your contacts and groups.

With the network graph you can keep track of contacts and groups.

Use Humboldt Life for discussions

Are you looking to discuss specialist issues with other colleagues? Or pursue interdisciplinary debate? Do you want to connect with other Humboldt Clubs? On Humboldt Life you can start

new groups or join existing groups to share knowledge and ideas on diverse subjects. Whether monodisciplinary or multidisciplinary – you decide what you would like to discuss and with whom.

The group functions offer various options for organising discussions.

Showcase your publications

Every member of Humboldt Life can list their own publications and enter them in a central publication database, irrespective of whether they are books, articles or reviews. In the publication database you can tag the publications that resulted from sponsorship granted by the Alexander von Humboldt Foundation. In addition, you can cite co-authors; if they are also members of Humboldt Life their user profile will then be linked with your publication.

The publication database allows others to view your publications.

Share your life in research with the network

Post photos and blogs to document exceptional moments such as a research award ceremony, your field research or the Kolleg you organised with the support of the Humboldt Foundation. This will allow the Humboldt Family to discover more about your life in research.

Make a photo album or write a blog to share your experiences with others.

Thomas Garvey's publications

Own publications

Article in a book
On elementary concrete geometry
M. Lombardy, **T. Garvey**, P. Pythagoras, B. Kobayashi, *Swiss Journal of Harmonic Algebra* (2014)

Article in a book
Combinatorially positive definite, isometric, minimal hulls and invariance methods
T. Garvey, B. Stoker, P. Duchamp, W. White, *American Journal of Mathematics* (2013)

Article in a book
Null Gaussian trivally algebraic moduli and convex geometry
T. Garvey, A. Moore, I. Kumar, I. Robinson, *Advances in Geometry* (2013)

Article in a book
Primes over anti-extrinsic complete lines
C. Wu, **T. Garvey**, V. Takahashi, F. Garcia, *Advances in Mathematics* (2013)

Article in a book
Left-Smooth, surjective rings and problems in logic
T. Garvey, N. Wilson, A. Taylor, K. White, *Bulletin de la Société Mathématique de France* (2012)

Article in a book
Super-linear, multiply positive small Conway monodromies for a Riemannian subset

Publicise your movements

Use Humboldt Life to keep your contacts updated and publish details of conferences or symposia you are attending or organising so that those in the network know where you are and what you are doing. Perhaps another Humboldtian will happen to be in the vicinity at the same time and you can get together in the network and on the spot as well.

With the event overview you can show your contacts where you are at the time.

Stay in contact with us

The Humboldt Foundation acts as a career co-pilot, helping you to develop your networks. Contact us if you have any questions about sponsorship, or life and research in Germany. We look forward to hearing from you!
